1 Formulas usadas

$$\mathcal{A}_{born}(q') \propto \tilde{T}_1(q') \tilde{T}_2(q') \quad (1)$$

$$\chi(s, b) = \frac{1}{s} \int_0^{30} q' dq' J_0(bq') \mathcal{A}_{born}(s, t), \quad -t = (q')^2 \quad (2)$$

$$= \frac{1}{s} \int_0^{30} q' dq' J_0(bq') \mathcal{A}_{born}(s, -(q')^2) \quad (3)$$

$$\mathcal{A}_{eik}(s, t) = is \int_0^{20} b db J_0(qb) \left[1 - e^{i\chi(s, b)} \right] \quad (4)$$

1.1 OBS:

- Para secao de choque total eiconal tomemos $q = 0$ e $q' \neq 0$.
